Art Unit: 1761

This application contains claims 11-16 drawn to an invention nonelected with traverse in papers submitted February 12, 2004. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Glacino (US Patent No. 3,519,437), Poiger et al (US Patent No. 4,194,017), Heyland et al (US Patent No. 4,879,130), and Ter Braak (US Patent No. 5,962,061).

Glacino teaches a process for preparing a flavoring mix comprising heating reactants with water as is claimed (see entire patent, especially Examples X and XI, and claims 7 and 8).

Poiger et al teach a process for preparing a flavored base comprising heating reactants (e.g. protein and saccharide) with water for 0.5 to 5 minutes to a temperature

Art Unit: 1761

in the from 100° to 200° C as is claimed (see entire patent, especially the abstract and claim 1).

Heyland et al teach a process for preparing a flavoring agent comprising heating reactants (e.g. amino acids and sugar) with water for 30 seconds to 30 minutes at a temperature of 80° to 140° C as is claimed (see entire patent, especially claim 1).

Ter Braak teaches a process for preparing a flavoring mix comprising heating reactants (e.g. protein and sugar) with water as is claimed (see entire patent, especially claims 1-3).

The claims differ as to the specific water content reduction.

The water content reduction would be no more than inherent and/or obvious to that of the prior art at the same components, times, and temperatures are utilized.

In the absence of a showing to the contrary, the water reduction is merely deemed to be a matter of choice and dictated by the desired product.

Applicant's arguments filed August 5, 2004 have been fully considered but they are not persuasive.

Applicant argues that the prior art does not teach critical limitations of the claimed invention.

The prior art clearly teaches heating a composition comprising a carbohydrate source and a nucleophilic species, as defined by Applicant, for the claimed times and temperatures. Applicant's claims do not define over that of the prior art. Applicant's claims do not exclude additional components or steps of the prior art.

Art Unit: 1761

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

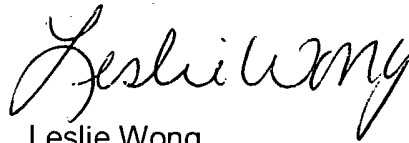

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
